

Governor Inslee's Illegal Lockdown Orders

By Dean L. Gano

11/25/2020

The governor's orders are illegal on several fronts. First, he has no right as a Governor to write laws. His job is to enforce the laws our elected congress passes. Secondly, the act of locking someone down, be it a business or a person, aside from being unprecedented, is a direct violation of the U.S. Constitution. State officials can justify a lockdown under the traditional police powers of the state if they could show they are actually protecting the health of the citizenry, but they cannot.

The original concept of state powers being able to do whatever they wanted was modified by the Fourteenth Amendment, which prohibits the states from depriving any person of life, liberty, or property without due process of law.

Due process of law means notice and hearing or trial. When the state (or a city within a state) imposes a statewide (or citywide) lockdown, it is not providing due process to the individual. It is taking people's liberty (i.e., economic liberty) and their property (i.e., their business or livelihood) without due process of law, in violation of the Fourteenth Amendment. Every federal judge in the land should be declaring state and local lockdowns a violation of the Constitution now!

Even if there were laws passed like those Governor Inslee has ordered, they would be challenged in court and found to be arbitrary and capricious and thus invalid. And here is why:

1. **Requirement to wear masks:** The various government agencies claim that a mask protects against transmission. They also argue that since about 50% of people who test positive for COVID-19 are asymptomatic we all need to wear them to make sure the asymptomatic ones don't infect the healthy people and thus control the spread.

Fact Check: A CDC Study ¹ finds an overwhelming majority of people getting coronavirus, wore masks. The study shows that despite over 70 percent of the case-patient participants' efforts to follow [CDC recommendations](#) by committing to always wearing face coverings at "gatherings with ≤ 10 or >10 persons in a home; shopping; dining at a restaurant; going to an office setting, salon, gym, bar/coffee shop, or church/religious gathering; or using public transportation," they still contracted the virus. This notion of providing protection is also false based on the science of how we know the virus is transmitted. If you are asymptomatic, you do not produce the virus in any great quantity so you can't easily spread it to others; unless you are kissing and swapping spit.

This is evidenced by the January edition of Dr. Anthony Fauci, who was adamant that "In all the history of respiratory viruses of any type Asymptomatics have never been a major disease vector." "But the one thing historically that people need to realize is that even if there is some asymptomatic transmission, in all the history of respiratory born viruses of any type, asymptomatic transmission has never been the driver of outbreaks. The driver of outbreaks is always a symptomatic person. Even if there is a rare asymptomatic person that might transmit, an epidemic is not driven by asymptomatic carriers." See the video of his words here:

https://www.newsbreak.com/news/2075638740531/here-is-a-video-of-fauci-explaining-in-january-2020-that-asymptomatic-transmission-is-never-the-driver-of-outbreaks?s=ws_native

But wait a minute, this was in January 2020, when the famous Dr. Fauci also said the coronavirus was not a big deal, but when his psychopathic friends determined they could use it to their advantage to control the sheeple, he changed his declaration. On June 10, 2020, this same person, the now royal Sir Anthony Fauci said: "What happened the other day is that a member of the WHO was saying that transmission from an asymptomatic person to an infected person was very rare. And we know from epidemiological studies that they can transmit to someone who is uninfected, even when they're without symptoms." See the video of his words here:

<https://nypost.com/2020/06/10/anthony-fauci-slams-who-over-very-rare-coronavirus-claim/>

New found knowledge or a big fat lie? Either way, the big question is why would the esteemed Dr. Fauci tell us two completely different stories? And why hasn't

the main stream media or any politicians responded to this huge contradiction? And it is clearly a lie because if indeed, there are epidemiological studies to show this causation, why didn't the good doctor tell us where they are?

Answer: Because there are no known causal relationships whereby an asymptomatic person can transmit a virus to the public. And when I searched the National Institute of Health website for studies that show such a pathway I found [32,216 studies](#) on virus transmission and not a single one of them confirmed what Dr. Fauci said.

So, while he is clearly a liar, the bigger question is why do the sheeple of the world, including the news media who are so righteously protecting us, accept without question, such dubious statements from one of our Government employees? And why isn't Governor Inslee and his sycophants looking into these lies?

2. **Requirement to limit social gatherings, aka Lockdowns:** Governor Inslee doesn't want you to have any friends or family visit you on Thanksgiving because it will spread the virus.

Fact Check: Like all of these orders, the governor is focused on solving the wrong problem. The focus should be on death, not spread, and death is not really a problem here. Overwhelming spread to the point of overloading our healthcare facilities has never and is not now a problem either. Also, because we now know that transmission occurs when the virus has concentrated in stagnate air and you spend several hours in that infected environment you might get infected.

Evidence of this can be seen in the fact that most of those infected get it from a family member while being locked down.² So, the lockdowns are not a preventative measure, but actually make the spread worse. Also, since the probability of death from this coronavirus is about 0.035%, it is not a health crisis at all. To wit: if we consider that in the U.S., one person in every 116 people die each year from "acceptable causes," and deaths from COVID-19 in Washington State are about one in every 2,730, that is 1/24 the number of "acceptable/normal" deaths per year.

Furthermore, this is the first time in human history that lockdowns have been implemented as a way to fight a pandemic. In fact, all the healthcare organizations in the world have always said that once the pathogen has entered the population, the worst thing you can do is lock people inside dwellings. And there is not a single credible study or analysis showing they provide value of any kind. Instead, they have killed more people than the coronavirus because tens of thousands of people did not get early treatment of the 26 different comorbidity causes like cancer and heart issues, suicide, domestic abuse, and drug use.³

Next, throw in the untold damage to our mental health, a 300% increase in failing grades in our schools, and the destruction of so many businesses.

3. **Declaration of a health crisis** - because many people will die if we don't follow these orders.

Fact Check: Most importantly, is the fact that we have preventative medicines that can prevent infection in the first place, or if you do get the virus, they can be used to cure the infection and the only reason people have died is because our government healthcare agencies and community doctors have totally failed to do their job. It is as simple as taking supplemental Zinc along with Zinc ionophores like Vitamins C, D, E and Melatonin every day. If you do get sick, get some Hydroxychloroquine (HCQ) to take along with the Zinc ASAP.

Given these broad false claims by the Governor, let's look at each one of his orders and see if they have any basis in factual causes.

Governor Inslee's Illegal Orders:

1. **Indoor Social Gatherings** with people from outside your household are prohibited unless they (a) quarantine for fourteen days (14) prior to the social gathering; or (b) quarantine for seven (7) days prior to the social gathering and receive a negative COVID-19 test result no more than 48-hours prior to the gathering. A household is defined as individuals residing in the same domicile.

No Basis In Fact: This order assumes that asymptomatic people can transmit the virus. As we have already learned, there is no proof of this and based on what we know of the causes involved in virus transmission, it is highly unlikely that asymptomatic people can transmit the virus. If friends or relatives are experiencing any symptoms, they should not come to the festivities, but that is our decision to make regardless, - certainly not our incompetent governor.

2. **Outdoor Social Gatherings** shall be limited to five (5) people from outside your household.

No Basis In Fact: Virus transmission requires long term exposure to stagnant air which is impossible outdoors, so there is no evidence to support this order. The limit of five people is laughable – based on what??? Why five, why not seven? Let's have some fun and see how one might calculate such a number. For example, we could assume that if only 3% of the population can be infected at one time (an estimated number from government scientists) then if you live in a community of 100,000 people, 3000 could be infected, which is one in every group of 34 people. If we assumed that one out every five people are stupid enough to mingle with others when feeling sick that would mean out of every 167 people,

only one would be infectious, so groups of 166 could gather safely. Using this same simple logic, the governor's limit of five people would mean that all 100,000 people in your community (100%) would have to be infected. This guy is brilliant!

3. **Restaurants and Bars** are closed for indoor dine-in service. Outdoor dining and to-go service are permitted, provided that all outdoor dining must comply with the requirements of the Outdoor Dining Guidance. Table size for outdoor dining is limited to a maximum of five (5) people. These modified restaurant and bar restrictions go into effect at 12:01 a.m. Wednesday, November 18, 2020.

No Basis In Fact: Again, as we already know, the outdoor restrictions are totally bogus. The indoor infection issue could be a valid concern, but a better way to prevent transmission inside restaurants and bars would be to screen everyone entering. Since we know that 88% of all infected people have a fever as one of the first symptoms, take everyone's temperature and ask if they feel sick before being allowed to enter. Also, if Governor Inslee was actually concerned about the citizens, instead of power, he would ask everyone to take Zinc and Zinc ionophores. No one would get sick and if they did and were given these compounds within two days of first symptoms, no one would die from COVID-19. NOTE: 96% of registered COVID-19 deaths involved one or more pre-existing conditions. Only 6% of U.S. deaths are from COVID-19 alone. ⁴

4. **Fitness Facilities and Gyms** are closed for indoor operations. Outdoor fitness classes are permitted but are subject to and limited by the outdoor social gathering restriction listed above.

Violation: Again, the outdoor restrictions are totally bogus. The indoor transmissions could be a valid concern, but a better way to prevent transmission inside buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, every member of these establishments should be given a fact sheet like Appendix A on how the virus transmits and how they can protect themselves from it by taking Zinc and Zinc ionophores and no one would get sick.

5. **Bowling Centers** are closed for indoor service.

No Basis In Fact: Again, the indoor transmission could be a valid concern, but a better way to prevent transmission inside bowling alleys would be to take everyone's temperature and ask if they feel sick before being allowed to enter.

Also, the logic here is in direct conflict with the fact that grocery stores and big box stores can remain open. History of this disease shows us that no one gets the virus by visiting these large open space, well ventilated buildings like bowling alleys. Again, the bowling alleys should provide a fact sheet (Appendix A) on how the virus transmits and how people can protect themselves from it by taking Zinc and Zinc ionophores and no one would get sick.

6. **Miscellaneous Venues:** All retail activities and business meetings are prohibited. Only professional training and testing that cannot be performed remotely, as well as all court and judicial branch-related proceedings, are allowed. Occupancy in each meeting room is limited to 25 percent of indoor occupancy limits or 100 people, whichever is fewer.

- Miscellaneous venues include: convention/conference centers, designated meeting spaces in a hotel, events centers, fairgrounds, sporting arenas, nonprofit establishment, or a substantially similar venue.

No Basis In Fact: Doesn't anyone see the hypocrisy in this restriction? It's OK to have court proceedings, but if you are from a different group than the protected class, you don't get to play. This is called discrimination and totally violates our constitutional rights.

7. **Movie Theaters** are closed for indoor service. Drive-in movie theaters are permitted and must continue to follow current drive-in movie theater guidance.

No Basis In Fact: Again, same story as with the bowling alleys. A much better way to prevent transmission inside buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, the logic here is in direct conflict with the fact that grocery stores and big box stores have remained open throughout this nonsense and history of this disease shows us that no one gets the virus by visiting these large open space, well ventilated buildings. Again, the Movie Theaters should provide a fact sheet (Appendix A) on how the virus transmits and how people can protect themselves from it by taking Zinc and Zinc ionophores and no one would get sick.

8. **Museums/Zoos/Aquariums** are closed for indoor service.

No Basis In Fact: Again, same story as bowling alleys and theaters.

9. **Real Estate:** Open houses are prohibited.

No Basis In Fact: Yes, this is a smaller environment than big stores or other well-ventilated buildings, but a better way to prevent transmission in an open house would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, keep the house well ventilated and limit the visit time to less than an hour.

10. **Wedding and Funerals:** Ceremonies are limited to a total of no more than 30 people. Indoor receptions, wakes, or similar gatherings in conjunction with such ceremonies are prohibited.

No Basis In Fact: Again, take everyone's temperature and ask if they feel sick before being allowed to enter. Also, just like the number 5 in the outdoor gathering order, there is no scientific basis for the number 30, so it is arbitrary and capricious.

11. **In-Store Retail** shall be limited to 25 percent of indoor occupancy limits, and common/congregate seating areas and indoor dining facilities such as food courts are closed.

No Basis In Fact: The logic here is in direct conflict with the fact that grocery stores and big box stores have remained open for six months or more with no evidence of anyone getting the virus by visiting these large open space, well ventilated buildings. And again, the Retail Stores should provide a fact sheet (Appendix A) on how the virus transmits and how people can protect themselves from it by taking Zinc and Zinc ionophores and no one would get sick.

12. **Religious Services** are limited to 25 percent of indoor occupancy limits, or no more than 200 people, whichever is fewer. Congregation members/attendees must wear facial coverings at all times and congregation singing is prohibited. No choir, band, or ensemble shall perform during the service. Vocal or instrumental soloists are permitted to perform, and vocal soloists may have a single accompanist. Outdoor services must follow the Outdoor Dining Guidance, found here, applicable to the structure or facility.

No Basis In Fact and a Total Violation of our First Amendment: The U.S. Supreme Court just ruled this order as a blatant violation of our First Amendment Rights. The indoor restrictions could be a concern, but a better way to prevent

transmission inside buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, the logic here is in direct conflict with the fact that grocery stores and big box stores have remained open and our history of this disease shows us that no one gets the virus by visiting these large open space, well ventilated buildings. Also, if everyone was asked to take Zinc and Zinc ionophores, no one would get sick and if they did get sick and were given these compounds within two days of first symptoms, no one would get sick or die. The restriction on choirs singing is valid because we have evidence of transmission in this setting.

13. **Professional Services** are required to mandate that employees work from home when possible and close offices to the public if possible. Any office that must remain open must limit occupancy to 25 percent of indoor occupancy limits.

No Basis In Fact: Again, indoor transmission could be a concern, but a better way to prevent transmission inside buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, if everyone was asked to take Zinc and Zinc ionophores, no one would get sick and if they did get sick and were given these compounds within two days of first symptoms, no one would get sick or die.

14. **Personal Services** are limited to 25 percent of indoor occupancy limits.

- Personal service providers include: cosmetologists, cosmetology testing, hairstylists, barbers, estheticians, master estheticians, manicurists, nail salon workers, electrologists, permanent makeup artists, tanning salons, and tattoo artists.

No Basis In Fact: Again, indoor transmission could be a valid concern, but a better way to prevent transmission inside all buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, if everyone was asked to take Zinc and Zinc ionophores, no one would get sick and if they did and were given these compounds within two days of first symptoms, no one would get sick or die. And as previously discussed, the 25% number is totally without merit.

15. **Long-term Care Facilities:** Outdoor visits are permitted. Indoor visits are prohibited, but individual exceptions for an essential support person or end-of-life care are permitted. These restrictions are also extended to the facilities in

Proclamation 20-74, et seq. All other provisions of Proclamations 20-66, et seq., and 20-74, et seq., including all preliminary criteria to allow any visitors, remain in effect.

No Basis In Fact: Again, indoor transmission could be a concern but a better way to prevent transmission inside buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter. Also, if everyone was asked to take Zinc and Zinc ionophores, no one would get sick and if they did and were given these compounds within two days of first symptoms, no one would get sick or die. The elderly should be given Zinc and Zinc ionophores daily to build up their blood serum Zinc levels, which should be checked periodically to make sure they are high enough to fight any and all viruses.

16. Youth and Adult Sporting Activities: Indoor activities and all contests and games are prohibited. Outdoor activities shall be limited to intra-team practices only, with facial coverings required for all coaches, volunteers and athletes at all times.

No Basis In Fact: The indoor contact could be a concern, but a better way to prevent transmission inside buildings would be to take everyone's temperature and ask if they feel sick before being allowed to enter and partake in the activity. Also, 99.997% of young people simply do not die from COVID-19.

Bottom Line: Aside from violating our constitutional rights, the governor and his minions have no scientific basis for these orders and they should be shot down by legitimate courts ASAP. What is taking so long for our justice system to protect us from these tyrants? It's time for thinking people to stand up and act against this insanity. Use Appendix A as a handout to your friends, business associates, customers, etc.

Appendix A

Facts You Should Know About COVID-19

1. If you are under 45 and healthy and get COVID-19 you may experience mild cold-like symptoms, and you will not die.
2. You are about 25 times more likely to die of something other than COVID-19.
3. You can prevent infection if you take supplemental Zinc and Vitamins like, C, D, E and Melatonin.

4. If you do get infected you can be cured with supplemental Zinc and Hydroxychloroquine, a cheap prescription drug if you act within days of feeling symptoms. Do not wait for or rely on testing before starting this treatment.
5. If you are asymptomatic you cannot transmit it unless you kiss someone else.
6. If you are not feeling well or show any flu or cold symptoms isolate yourself.
7. 88% of all infected people have a fever as one of the first symptoms.
8. Transmission occurs when the virus has concentrated in stagnate air and you spend several hours in that infected environment.
9. There is not a single NIH or CDC study showing transmission can occur outside.
10. When a coronavirus enters the body, it tries to get inside a cell in the respiratory tract so it can reproduce. If it does, it kills the cell it reproduced in and spews new viruses through breathing or coughing.
11. Our natural immune system defense against all viruses occurs when compounds from Vitamins like C, D, and E, Quercetin, or Melatonin create a non-acidic environment around the cell and the virus proteins degrade and fall apart before they can enter the cell.
12. If the virus does get inside the cell, Zinc is used to prevent the virus from replicating. Also, the vitamins are required to carry Zinc inside the cells.

COVID-19 Preventative Treatment From Dr. Zelenko

For Low & Moderate Risks Patients take:

Elemental Zinc 25mg once a day
 Quercetin 500mg once a day
 Vitamin C 1000mg once a day
 Epigallocatechin (EGCG) 400mg once a day

For High-Risk Patients take:

Hydroxychloroquine (HCQ) 200mg once a day for 5 days, then once a week
 Elemental Zinc 25mg once a day
