

# ‘Misinformation’ or Lies?

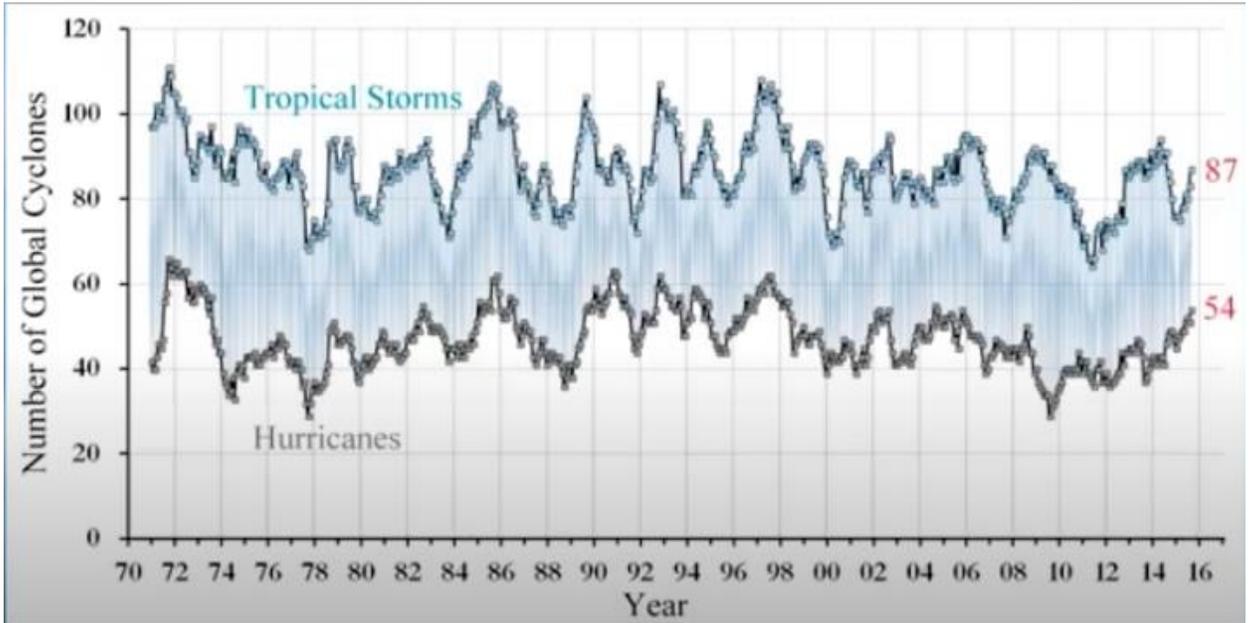

By Dean L. Gano; August 4, 2021

Just ask yourself: what is misinformation? The dictionary defines it as incorrect or misleading information, which is fine, but when the liberal left uses this term, they mean shut-up and swallow what I am saying. No debate is allowed! No evidence is provided that the reported disinformation is actually false or misleading; just shut-up because we know what is best for you stupid little sheeple! Here at Fact-Checked.org we seek to provide the truth about the world we live in and expose the lies being told to us by our own government, scientists, and Big Tech. Here is a short list of some of those lies:

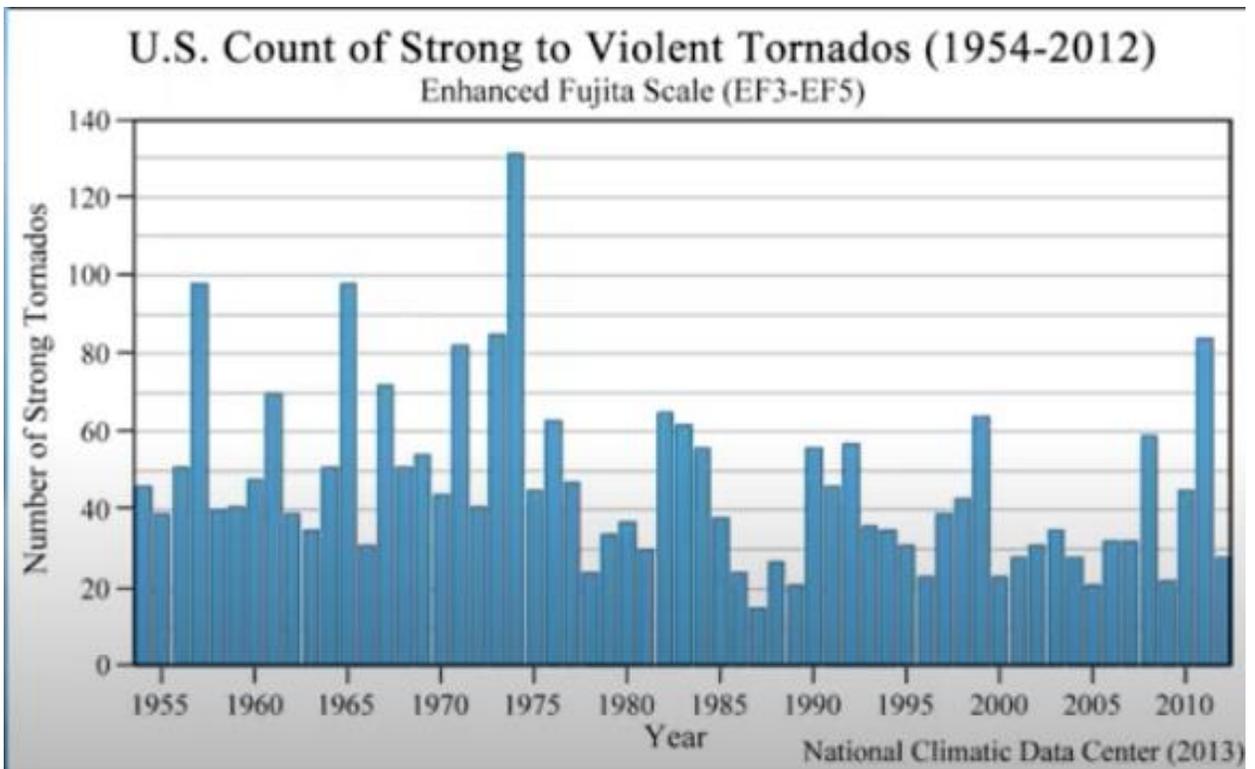

1. The climate is changing because of mankind’s careless burning of fossil fuels.  
**False:** Yes, the climate is changing, it’s called weather, but it is not man-caused. See [Climate Change and Real Science](#).
2. The Antarctica ice cap is melting faster than ever before.  
**False:** Antarctica holds 90% of earth ice and has [been growing for decades](#).
3. Greenland is melting faster than ever before.  
**False:** From one snapshot of measured data, from 1942 to 1992 Greenland’s ice [got 268 feet thicker](#) and continues to grow today.
4. Sea Levels are rising like never before and threatening all coastal cities with flooding.  
**False:** See actual sea levels for the past 25,000 years here:

5. Tropical Storms and Hurricanes are getting more frequent and intense.  
**False:** There is no increasing trend at all. See actual government data below:

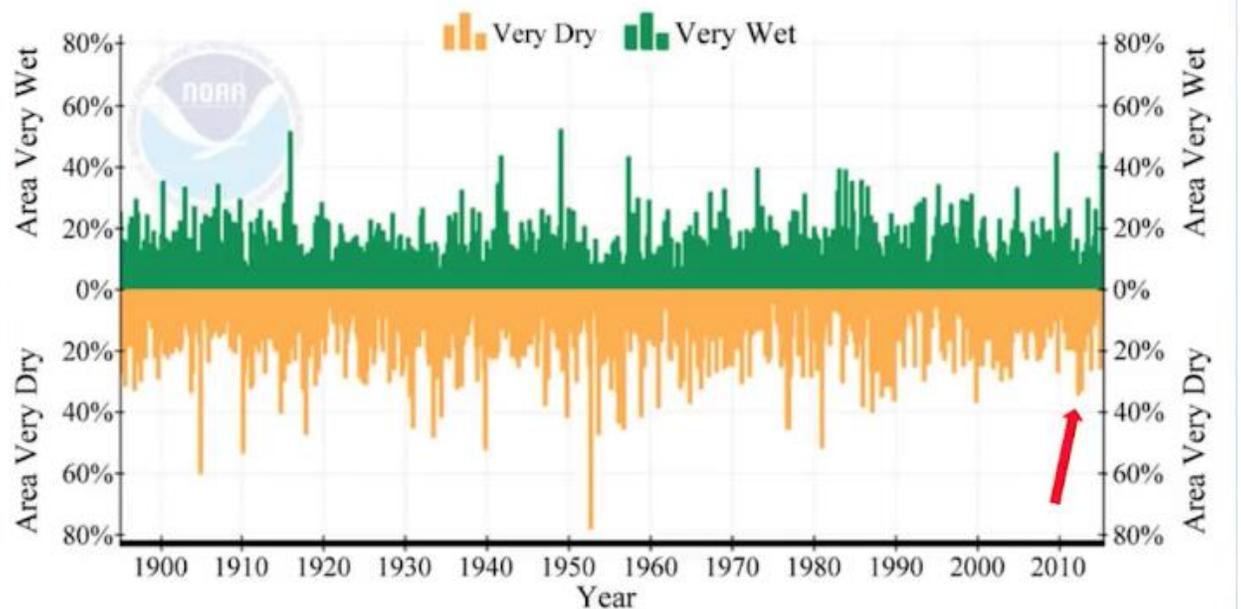

6. The number of strong U.S. Tornadoes have increased substantially in recent years.  
**False:** See data below:

7. The drought conditions in the United States is getting worse.  
**False:** See actual NOAA data below:

### Continental US Very Dry and Very Wet Area (1895-2015)

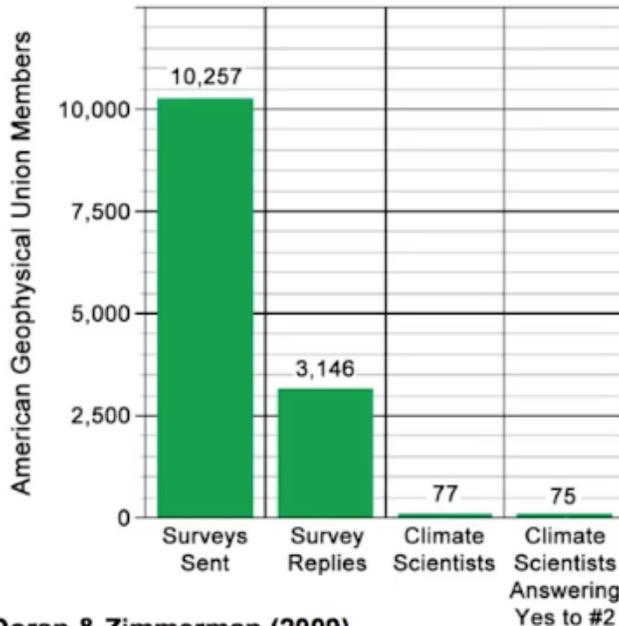

**NOAA (2015)**

8. President Obama said in 2013 that 97% of Scientists agree that man-caused climate change is real.  
**Totally False:** See actual date below from a pole of the American Geophysical Union of Geology Scientists in 2009. Also, read this statement from 31,478 American Scientists, including 9,029 PhDs: "There is no convincing evidence that human release of carbon dioxide, methane, or other greenhouse gases is causing or will in the foreseeable future, cause catastrophic heating of the Earth's atmosphere and disruption of the Earth's climate. Moreover, there is substantial scientific evidence that increases in atmospheric carbon dioxide produce many beneficial effects upon the natural plant and animal environments of the Earth."

# 97% of Scientists Accept Man-Made Warming?

AGU Climate Science Survey Results

Doran & Zimmerman (2009)

1. When compared with pre-1800 levels, do you think that mean global temperatures have generally risen, fallen, or remained relatively constant?
2. Do you think human activity is a significant contributing factor in changing mean global temperatures?

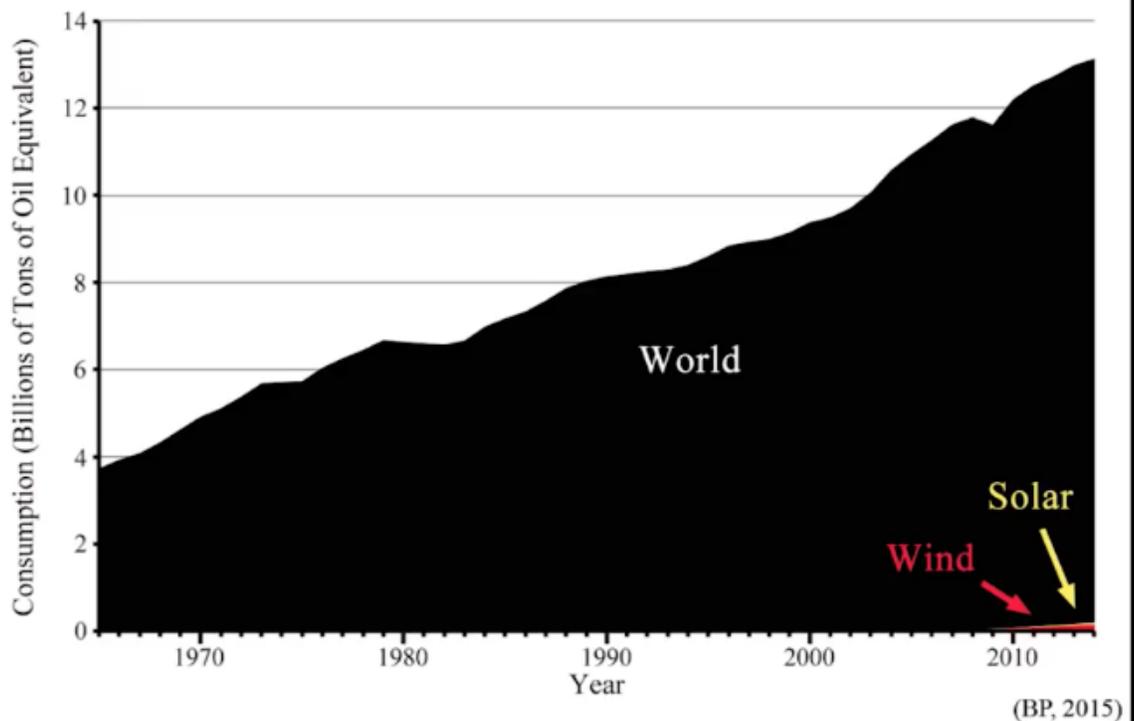

9. Renewable energy sources like Wind and Solar are the best solution to man-caused climate change.

**False:** The current increase in Wind and Solar units around the world cannot keep up with the increase in consumption each year and are only responsible for a tiny amount of energy production. Also, they don't make sense economically. You only get back [82% of the energy required to make the solar panels](#) in the first place.

See world power usage below:

# Wind, Solar, and the Energy Mountain

Total World, Wind, and Solar Energy Consumption (1965-2014)

10. Nuclear energy is dangerous and cannot provide enough energy to feed a growing populace.

**False:** Nuclear energy is the safest, cheapest, most carbon free source of energy we have and should be promoted by all governments. In France, 70% of electricity is created by Nuclear power and their energy prices are half what Germany's mostly "Green" renewable energy is. [Small molten salt reactors](#) are a low-pressure, fail-safe option that could be deployed anywhere. Watch [The Green Atom](#) for more details on safety.

11. Systemic Racism is a major problem in America.

**False:** [Not only NO, but Hell No!](#) It's a total fabrication by the socialist regime of left-wing politicians, [corporate media](#), and big tech. It is being used to create division among the people in their effort to destroy our country.

12. If you want to know the answer to any question, you should Google it.

**False:** Based on [our research](#), Google is the last place you should go to get honest answers. Google and most of the other big tech companies are manipulating their searches and data to promote a radical socialist agenda. Alphabet Inc., who owns Google, who owns YouTube, which is transmitted on

Amazon servers, are working together to control the narratives the [Sheeple](#) are fed. Use DuckDuckGo if you want an honest search.

13. The COVID-19 vaccines are a proven safe way to prevent getting infected.

**Totally False:** From the Moderna and Pfizer Vaccine Fact Sheets: “The (Moderna/Pfizer) COVID-19 Vaccine is a vaccine and **may** prevent you from getting COVID-19. There are **no** FDA approved vaccines to prevent COVID-19.” Get the facts [here](#).

14. We must get a vaccine, social distance, and wear masks to prevent dying from COVID-19.

**False:** More than 6,000 NIH technical papers have shown that all healthy people can prevent infection and hence death if they have a normal level of blood serum zinc and zinc ionophores. To understand this, all one must do is ask why don't healthy children get sick and die, or why are some people of all ages asymptomatic when they get infected? **Answer:** Because they all have normal levels of zinc ionophores, like vitamins C, D, E. and zinc in their blood stream. OR, why are old people and those with compromised health conditions more likely to die from this virus? **Answer:** Because they don't have any zinc in their blood. Every single comorbidity condition associated with COVID-19 deaths is caused by a zinc deficiency. To learn the actual causes of infection, read this article: [COVID-19 and Real Science](#). And if you want to know how to treat this virus in case you get it, here is a “must read” Guideline: [COVID-19 Treatment Guide](#). This is important, because most likely your Doctor won't do this and you might die because of his/her wokeness. Also, Masks Don't Work! The NIH spent \$42 billion last year on research, but didn't do a single study on Mask effectiveness. Why? Because they have already done hundreds of studies and they show masks don't work on the COVID-19 virus. Again, see [COVID-19 and Real Science](#), where you learn the virus particles are so small they go right thru any regular mask.

15. Children must wear masks in school to prevent death from COVID-19.

**False:** [Not a single healthy child has died](#) from COVID-19 and only 340 unhealthy ones have died **with** the COVID-19 virus as a contributing cause, not because of the virus. This means a child has a 1 in 217,000 chance of dying **with** the virus, but zero percent change of dying of it. **Note;** there have been a few reports of healthy children dying from the virus, but no one even looked to see what the kid's blood serum zinc levels were to know if they were truly healthy. WHY? Because Doctors are taught to treat symptoms, and often know little about the causes – that's the scientist's job. Understanding the causes is what we do!

16. Children must wear masks in school to prevent transmitting COVID-19 virus to others.

**False:** Since healthy children that contract the virus are typically asymptomatic, they cannot generate enough virus to transmit it to others in an open environment. Also, if people simply make sure they are taking their vitamins and Zinc, they won't get seriously infected.

17. The CDC/FDA says Vaccines are the best solution to mitigate COVID-19 disease.  
**False:** Virus mutation is not included in the definition of the problem of “COVID-19 Disease”. Creating synthetic mRNA gene therapy injections based upon an initial copy of a viral strain without addressing or including virus mutation creates an ineffective short term antibody solution. Instead of creating vaccines which create spike proteins, why not create synthetic pharmaceuticals or utilize nutraceuticals like Vitamin D and Zinc, which interfere with and inhibit viral enzymes which produce spike proteins? This solution addresses the mutation issue, prevents viral reproduction, and actually mitigates COVID-19 disease, but reduces the profit for Big Pharma. See [Causes and Solutions for COVID-19 disease](#).
18. The 2020 presidential election was totally honest and uncompromised in any way.  
**False:** Mike Lindell has [provided much evidence](#) to show there was fraud, and the Senate audit of Maricopa County, Arizona has shown many irregularities. Also, early results from ongoing audits in Wisconsin, Georgia, Michigan and Pennsylvania are showing the same thing. For example: historically in Wisconsin they receive about 500 – 1,000 ballots from incapacitated voters, like in retirement homes. In 2020, they received 160,000 ballots like this, and OBTW, you don’t need voter ID for this kind of ballot. And this is only one of many examples that will be revealed soon.
19. There is no inflation and if Congress passes the \$1.2 T infrastructure and \$3.5 T budget agreement, the Biden Administration says it will decrease inflation. President Biden recently [told](#) an audience. “Because we’re going to be providing good opportunities and jobs for people, who in fact are going to be reinvesting that money back into all the things we’re talking about, driving down prices, not raising prices.”  
**False:** When we increase the money supply through manipulated economic activity controlled by government, a process which is essentially printing money, people will have more money to spend on too few goods available and further drive up the cost of goods in the U.S. Until the labor market is restored and the supply chains normalized, inflation will continue to be a long-term problem.
20. The American Education System provides the best education in the world.  
**False:** There are many surveys that rank the various education systems in the world and most show the U.S. far from the best, but for me a good indicator is whether or not adults can discern fact from fiction and when, [according to Gallup](#), 64% of Americans still trust our scientists today after all the lies outlined hear in, I would have to say our education system has totally failed. And OBTW, 79% of those who believe these lies are Democrats, compared to only 45% Republicans. For more details read one of the most important books of the century by John Ellis; *The Breakdown of Higher Education (2020)*, where we learn that our education system has been taken over by very progressive far left liberal professors and administrators.

## **Analysis:**

So, the questions are: [Am I the Only One](#) who sees these lies and why are they being told? If you are reading this article and got this far, I know you see it too and you want to know what to do about it. After several years of study and 77 years of living, I believe that what we are seeing is another surge in psychopaths trying to control the sheeple of the world. [The Persian Empire and the Han Dynasty](#) are good historic examples of this, so this is not new to the history of mankind and if we look closely, the causes come into focus.

If you take a high-level view of the history of mankind, what you see is that because the core value of all humans is a fundamental need to be needed, we gather together. By gathering together and sharing our lives through work, play and spiritual pursuits, we create something called the brotherhood of man. It always leads to gathering in groups of like-minded people. As those groups grow, they require leadership to function well. Since most people are not good at leading, a special person emerges from the group who seems to enjoy being a leader. As more people follow these leaders, the groups increase in size, and the groups become communities, Cities, States, and Nations. If the leaders are truly human and understand the golden rule, the group becomes very successful because everyone is given the freedom to pursue their right to life, liberty, and happiness.

But, as we explore this social history we see a consistent trend of nations becoming great and then crashing into oblivion. And the reason is always the same. The leaders become so enthralled with their power, the only way they can continue their exalted feelings is to be more powerful and in the process destroy the community of man that got them there in the first place. The reason America even exists is because the elite leaders of the British Empire thought they knew better than the people, but look what happened when the People stood up and fought for their God-given rights and we need to do that again.

This failure of leadership is caused by genetically defective humans who have a psychological disorder called psychopathy. Psychopathy is a complex personality disorder that includes interpersonal and affective traits such as controlling, glibness, lack of empathy, guilt or remorse, shallowness, and irresponsibility, and also behavioral characteristics such as impulsivity, poor inter-social control, and promiscuity. And, because the psychopath's driving force is to control other people, they need to be where the most vulnerable minds are – the cities. And according to 2016 census data about 80% of the U.S. population lives in cities and thus we have a higher concentration of these sick people.

As these defective humans gather in the cities, they procreate resulting in an explosion of psychopaths, like in the city of Portland, Oregon – perhaps the sickest in the world.

Psychopathy is believed to only affect approximately 1% of the general population. However, 15–25% of the male and female prison population ([Hare, 1991, 2003](#)), and 10–15% of substance abuse populations ([Alterman and Cacciola, 1991](#); [Alterman et al., 1993, 1998](#)) are psychopathic. <sup>1</sup>.

When we look for physical causes of psychopathic personality disorder we find the neural structures encompassed by the paralimbic system, including the amygdala, hippocampus, insula, orbital frontal cortex, anterior superior temporal gyrus, and the rostral, caudal, and posterior cingulate, may play a key role in psychopathy. Assessing these areas with high-resolution structural magnetic resonance imaging (MRI) scans of 254 male medium and maximum-security inmates, Kiehl and colleagues determined that reduced gray matter volumes (GMV) and concentrations (GMC) in paralimbic regions correlated significantly with the total score on the Hare Psychopathy Traits Checklist (Figure 1 below) used to diagnose psychopathy. <sup>2</sup> So, the evidence for this human genetic defect is found not only in the brain, but in the behavior of these individuals as described below in Figure 1.

1. Pathological lying – incapable of recognizing or telling the truth
2. Glib and superficial charm – an absence of self-consciousness
3. Grandiose sense of self
4. Need for stimulation or prone to boredom
5. Cunning and manipulative – use of deceit to cheat or con for personal gain
6. Lack of remorse or guilt
7. Shallow emotional connection with others
8. Callousness and a lack of empathy
9. Parasitic lifestyle – an intentional, manipulative exploitation of others
10. Poor behavioral controls – expressions of irritability, impatience and aggressive response to others
11. Sexual promiscuity
12. Early behavior problems such as lying, cheating, vandalism, bullying, etc.
13. Lack of realistic long-term goals – live day to day
14. Impulsivity – inability to resist temptation
15. Irresponsibility – repeated failure to honor obligations or commitments
16. Failure to accept responsibility for own actions
17. Many short-term marital relationships
18. Juvenile delinquency
19. Revocation of conditional release – not following agreed-upon behavior
20. Criminal versatility

### **Figure 1: Hare Psychopathy Traits Checklist**

Knowing the biological sources of psychopathy is important, because being caused by highly variable physical and genetic causes, we know that some people without a confirming diagnosis may only have a few of the defining traits, and it can vary from mild to severe depending on how much gray matter is missing in different parts of the brain.

Many psychological studies show that politicians are more likely to show psychopathic traits, and in one study, [Psychopathy by U.S. State, Ryan H. Murphy](#), Professor at Southern Methodist University, found the occupations that were most disproportionately psychopathic were in this order: CEO, lawyer, media worker, salesperson, surgeon, journalist, police officer, clergyperson, chef, and civil servant. He also found that the highest concentration of psychopaths is in Washington, D.C., which has almost twice as many as the next state, Connecticut, which has a high number of big business CEO's. Given that most politicians are lawyers, it is not uncommon to see these traits in them.

When asked a question that contradicts their stated position, the psychopathic politician will become very irritated and aggressive in their response. They will not try to understand the point or ask for more details of the topic – rather, they will start name-calling and digging a deeper hole trying to justify their illogical position. In doing so, they exemplify items 1, 3, 5, 8, 9, and 10 on the Hare Checklist. Look for this the next time you watch an interview with a politician. Like this one with [CNN host Wolf Blitzer and Nancy Pelosi](#).<sup>3</sup>

But why do most of these lies involve science? Unfortunately, our scientific communities have been polluted with government grant money and meddling politicians, and are no longer practicing true science where the only truth is the unknown. Our scientists need money to expand human knowledge and that can cause problems, the biggest of which is the common belief among scientists that consensus on the given subject is the goal. The thinking being that, if enough of us agree on something by performing all kinds of different experiments to prove it (using lots of government money) it must be right; and a huge Groupthink is created. This is exacerbated by the fact that one of the government's criteria for giving grant money is to see how many articles have been published on that particular subject. If an idea is new or challenges conventional wisdom the scientist is less likely to be awarded the grant money and must go elsewhere or lose their job. So, the groupthink is systematically perpetuated and our scientific knowledge is stifled. It's not that the scientists are psychopathic, but rather they are being controlled by psychopathic government officials and don't even know they are just pawns.

Politicians have hijacked the scientific community to influence the actions, beliefs, or behavior of voters as a way of gaining power. They seek to convince the majority of voters of their righteousness to show what great problem-solvers they are. If there isn't a problem, they create one, like the man-caused climate change hoax and now the COVID-19 hoax. The sheeple, who have never been taught the principles of causation and the need for evidenced - based causal relationships, simply listen for the best narrative and swallow it.

In both these activities, government and politicians, the incentive to challenge conventional wisdom is removed and their purpose of 'real science' is now focused on consensus and political narratives – the total opposite of pure science, which is to question everything and everyone. To make sure this dogma continues, our leaders have created and endorsed [cancel culture](#). With open debate removed from the table

these psychopaths are closing in on their final goal of complete control. But how can this happen with free and fair elections? Are people really that stupid? Well, maybe, but there are other causes too.

It is my belief that [American society has been corrupted by a very evil enemy called the Chinese Communist Party \(CCP\)](#).<sup>4</sup> This evil empire has quietly infiltrated every corner of our lives, from our education system, our media, our big tech companies, our governments at every level, and our health care systems by using these psychopathic leaders as pawns to meet their goal of destroying America. Further it is my belief that because the CCP is so effective at pandering to the [unthinking liberal minds](#) that they have worked their way into every one of these institutions. For details on this assertion, read [Wakeup Sheeple](#).

To make sure they control the psychopathic leaders, they have infiltrated our electoral systems and electronically control our elections to ensure their candidates win at every level of government. The Sheeple who run the voting machines are so naive, they have allowed them to be connected to the internet and the [CCP manipulates the votes](#) accordingly.

And when we ask why would China's psychopathic leadership want to overthrow America, we only have to look at the Communist playbook based on [Neo-Marxist Saul Alinsky's Rules for Radicals](#) (1971), which provides the following instructions on how to create a Socialistic State:

1. Healthcare – Control healthcare and you control the people.
2. Poverty – Increase the poverty level as high as possible because poor people are easier to control and will not or cannot fight back.
3. Debt – Increase the national debt to an unsustainable level. That way you are able to increase the taxes to pay it off and create even more poverty.
4. Gun Control – Remove the ability to defend themselves, which makes it easier to create a police state.
5. Welfare – Take control of every aspect of people's lives including food, housing, & income, because that will make them fully dependent on the government and thus easier to control. Note: Using COVID-19 as an excuse, the Federal Government has allowed people to not pay rent, thus not work, thus not transmit the virus and today with 7 million households doing this, the renters have incurred \$15 Billion in losses and are suing the federal government, which we will have to pay in the form of more taxes.
6. Education – Take control of what people read and feed their minds such that you can control the narrative and thus control them easier – Nice little sheeple.
7. Religion – Remove the believe in God so people can only focus on the belief in the government and be good little sheeple.
8. Class Warfare – Divide the people into the wealthy and the poor, whites, blacks, Asians, homos and homophobic and every other way you can. This will cause more discontent and it will be easier to tax the wealthy to support the poor while

creating unrest. With unrest you can be the leader and solve the problems it creates.

**Note:** To make sure all these initiatives are implemented you must use the state-run media to control the narrative by telling big lies like discussed above. Anyone caught disagreeing with our narrative will be silenced and victory will be ours.

Does that sound at all like the current Democrat Party's Agenda for America? Hummm?

So, now that we know the causes of this problem, we need solutions that prevent recurrence, are within our control, reinstates our goal of freedom, liberty, and justice for all and don't cause other problems.

### **Proposed Solutions:**

1. Demand every Swing State Senate perform Arizona style forensic audits in the 2020 elections. Once the truth is known, the cat is out of the bag and President Trump can become the rightful President again, and everyone will learn of the evil that lies within the Deep State and revolt against these psychopaths.
2. Demand that those who allowed or conspired to allow voting machines to be manipulated, are severely punished.
3. If the media companies fail to report the truth, everyone must communicate to everyone they know the facts that are revealed. This would best be done verbally because social media will also try to cancel any message that reduces their power over the sheeple.
4. Contact all your representatives and ask that they work with other states to create a national standard for voting that prevents all the types of cheating that is coming forth in the audits.
5. Also, the single most important protocol of this standard is to make sure all voting machines are free from any internet connections at all – None! They can use computers or electronics to count votes, but they must be based on paper ballots that must be audited every time to ensure no cheating has occurred.
6. Every concerned citizen should go to their election board and do their own investigation to make sure this kind of cheating is not even possible. If it is, take action to change the procedures.
7. Now that you know what to look for in politicians, do everything you can to prevent psychopaths from becoming our leaders.
8. By electing normal humans to represent us, they can set about to write laws that prevent these Big Tech companies from taking over our lives and get our freedoms back.
9. Go to your school boards if you have kids, and demand they teach [effective thinking skills](#) and American History that espouses our exceptionalism.

Please let us know your solutions by contacting us at <https://fact-checked.org/contact/>

## **Conclusion:**

“We are in the last battle. This is the apocalypse. We are fighting for the salvation of humanity. We all knew this was coming at some point. I never believed it would be in my lifetime, but here it is. We are the happy few, the band of brothers and sisters. We know what our job is in life. We know that we are part of this battle. We have to fight and we have to die with our boots on if necessary. Everybody here, I’m confident, knows what their duty is and is going to do that duty. I know all of you are going to be beside me.” – Robert F. Kennedy Jr.

Let’s all fight back!
